

RESIDENTS OF DISTRICT SHOULD NOT FAIL TO CELEBRATE JULY 1ST. IN WAINWRIGHT!

The Wainwright Star

VOLUME VI

WAINWRIGHT, ALBERTA, WEDNESDAY, JUNE 17, 1914

NUMBER 37

STANDARD OIL INTERESTED IN LOCAL FIELDS

GRATTAN OIL CO. SECURE LEASES ON 30 SECTIONS

Great Confidence Placed in Prospects for Oil in the Grattan Coulee.

Although there is an apparent lull in the oil situation so far as that locality in the vicinity of the Grattan Coulee is concerned, directors of companies holding leases with a view to drilling for gas or oil are none the less active. Sales around town have been quiet for the past week or more, although a large number of shares in both the Grattan Oil Co. and the Wainwright Oil & Gas Co. have been disposed of by local agents. Local people have purchased a goodly number of shares and it is generally believed that the prospects of finding oil in the Wainwright field are as good as in any other localities where interest has centred.

LEASE THIRTY SECTIONS.
The Grattan Oil Co. holds leases on a large number of sections in this vicinity and a few days ago secured additional leases on thirty sections in a locality that is believed to be east of here. In conversation over the telephone yesterday with Mr. Morris, president of the Grattan Oil Co., the STAR learned that this was correct, and Mr. Morris also stated that the Standard Oil Co. is also interested in the holdings of the Grattan Oil Co. and the Battle River Oil Co. "We are about to develop the best field in Western Canada," said Mr. Morris. "Experts who have thoroughly prospected this new field are of the opinion that it will prove the best in the world," continued he. In regard to the outfit that will drill on our holdings in the Grattan Coulee, I might say that this is in the Strathcona yards. Specifications as to drilling are being prepared and before long drilling operations will be started."

LOOKING OVER COUNTRY.
Several experts have visited here recently and have left town in the early hours of the morning and returned after dusk. Their movements have been mysterious which is natural in view of the purpose these men have. Their direction has been west and farmers who reside on this side of the Battle River, south of the G. T. P. bridge, affirm that prospectors have been going over the country in that vicinity for the past three weeks. Nothing definite, however, is known as to their movements, except that they are here to look over all claims and that they are making their investigations thorough and searching.

THROWN FROM RIG WHILE DRIVING TO TOWN ON MONDAY

Miss Horne Rendered Unconscious but Injuries were Not Serious.

Miss Horne, of Gilt Edge, a nurse who lives with her brother at Gilt Edge, sustained painful injuries on Monday when the pole of the wagon in which she and her brother were driving to town dropped. The team ran away and both were thrown out. She remained on the ground in an unconscious condition until found by parties coming to town. Her brother, who escaped without injury, was not aware that his sister had been hurt, and ran after the horses.

Miss Horne's injuries are slight, although she received a severe shaking up and suffered injury to her back. She is laid up at present at the home of Mr. and Mrs. F. L. Corbett and Dr. Little is rendering medical aid.

The fifth annual exhibition and fall fair of the Irma Agricultural Society will be held at Irma on Thursday, September 17th. The list is now being printed by the STAR and includes classification covering a wide and extensive field of exhibits.

The marriage of Miss Edna Francis, daughter of Mr. and Mrs. Henry Hawkins, of Seattle, Wash., and Ernest Henry Norman, of Metlak, took place in the Grace Methodist church on Wednesday morning, June 10th. The ceremony was performed by Rev. C. R. Corcoran.

Band Master King assures those interested in the band that at least twenty bandmen will be seen on July 1st. Old players and beginners are plugging away, and for better or for worse are determined to "play in the band."

The STAR is indebted to Mr. A. A. Mondou, M.P., for a special number of the Ottawa Journal, containing sixty-four pages of interesting matter in connection with the Dominion Capital and activities in and around that city.

Two lots at the corner of Fourth Ave. and Main Street are being skinned of sod and prepared for a tennis court. A tennis club has been formed and a large number will take part in the popular game this summer.

A sample of spring wheat, Marquis variety has been left at the STAR office. It was grown by W. B. McDougall and measures twenty inches in height. This is the best sample yet received and shows what progress the crops are making.

The Empire concert which proved such a success will again be represented on Friday June 26. Moving pictures will be a feature. All the successes from the last performance will be repeated and the price reduced to 50 cents.

INSPECTOR LOUD IN PRAISE GIVEN LOCAL SCHOOL

Says Work is being Well Done and Board is to be Congratulated.

The periodical report of the School Inspector has been submitted to the local board and it is safe to say there is not another school in the whole province that is able to show such splendid progress as the Wainwright institution, which for years has been steadily gaining a reputation that is envied by other towns throughout the entire province.

Inspector McGregor's report deals with each teacher at the school and the preliminary part of it states that the several members of the staff are, "without exception, doing good work and the Board is fortunate to have five such efficient teachers in their employ."

COUNCIL AGAIN HEARD TALK ON TOWN SURVEY

Municipal Engineer of Edmonton Appeared Before Council Last Night.

The most important matter dealt with last night at the council meeting was the question of engaging a municipal engineer to carry out the proposals being considered in regard to having a survey of the town made. Mr. T. Maxwell, of the firm of Maxwell & McKenzie, was present at the meeting and gave a brief outline of what he thought the town should do. During the course of his remarks he also referred to the installation of an electric lighting plant here, giving a general outline of the systems being used and the cost of same. The matter was laid over until a later date when a special meeting will be called.

Mrs. W. J. McPhee was a guest last week with Mr. and Mrs. L. Dodds, of Viking, returning here on Sunday evening in company with Mr. McPhee, who went up on the afternoon train.

Robert Kenny, who has been on his homestead a short distance south of Vermilion, has returned here. Mr. Kenny is farming his land this year and has a large area seeded.

A sample of fall rye grown on Colin Cattle's farm has been left at the STAR office. Mr. Cattle has a field of rye of twenty acres, the growth standing thirty eight inches above the ground.

SUCCESSFUL CELEBRATION IS ASSURED

Preparations for Big Day Have Been Completed -- Weather Man Must be Kind.

Two weeks from today is July 1st and on that day it is expected that Wainwright will celebrate in a manner never before known in the history of Dominion Day sports here. The various committees are doing their work well and a big program of sports is assured. The celebration has received splendid advertising, and bills are now posted in towns along the C.P.R. and C.N.R. as well as in towns between Biggar and Edmonton and every post office within a radius of fifty miles of Wainwright. As a result, the biggest crowd ever seen in the town should be here to participate in the celebration.

Mayor Lally, who is chairman of the businessmen's committee and other officers of the same committee are sparing no time to make the day a success from every standpoint. Several meetings of the committee have been held and progress in every branch of the program is reported. The work of preparing for the big day has been well done and it now rests with the weather man to complete a successful day's sport.

Apart from baseball, which will form a big feature of the day's program, horse racing will be a drawing card that should attract attention from all parts of the district. Athletic events of all kinds will be run off, and the Wainwright band will be in attendance all day. A grand display of fireworks will be the feature of the evening, after which a dance will be held in the Elite Theatre.

Those in charge of the celebration are of the opinion that Wainwright's sixth annual sports day should prove the best in the town's history. And it undoubtedly will if prospects continue as bright as at present. The greater part of the program will be seen on the agricultural grounds, where one of the best half mile tracks in Northern Alberta is seen. Inside the track baseball will be witnessed and along with other games it is expected that a burlesque game will also be witnessed.

People residing in this locality should not lose the opportunity of visiting Wainwright on July 1st, when the various committees in charge will strain every point to see that the visitors are well looked after and given amusement they will enjoy.

About sixteen friends of Mrs. J. H. Dawson, spent the afternoon and evening at the Dawson farm, north of town, on Monday afternoon, the occasion being Mrs. Dawson's birthday. A very enjoyable time was spent by those who were in the party.

Mrs. Livingstone, Third Ave., will be at home in honor of her mother, Mrs. Peter McDonald, on Saturday afternoon from 3 to 5 o'clock. On Monday evening they will leave for Douglas, Ont., accompanied by Miss Margaret Livingstone.

Rev. T. F. Marshall, pastor of St. Thomas Church, will preach an afternoon service at the Asot School on Sunday next, commencing at 3 p.m.

PROUD OF SCHOOL

J. L. GEROW, Chairman of the School Board, who thinks Wainwright is fortunate in possessing such a staff of efficient teachers.

TRAMPS WILL BE DEALT WITH TO EXTENT OF LAW

Deputy Attorney General Issues Instructions to Authorities of Provincial Towns.

Supt. Walton is apparently of the same opinion as Justice of the Peace Ross and other local people and is doing everything in his power to rid the town of vagrants, who have made Wainwright their stopping place for the past while. He has issued orders to the rail way men to have all cars searched for tramps and has asked the town policemen to watch all incoming and outgoing trains.

J. D. Hunt, Deputy Attorney General, has written local authorities to prosecute to the full extent of the law all beggars and tramps who are seen in this vicinity. The Attorney General's department is anxious to rid the whole province of men of this class and it is understood that he has issued the same instructions to magistrates and justices of the peace throughout Alberta.

The U.F.A. of Edgerton are holding a field day at Edgerton on July 1st, when a big program of sports will form the day's amusement. President Tregillus, of the U.F.A. of Calgary, will attend and deliver an address during the day.

There is keen rivalry in town between certain real estate men over locating a party of Americans who came into the district last week. The controversy is a subject of general discussion.

G. C. Siddall, accountant at the Merchant's Bank, returned on Monday from Islay, where he spent a two week's vacation. Mr. Siddall was formerly stationed at Islay.

The makers of the New Perfection Blue Flame Cook Stove are holding a demonstration at the store of Musson & Ross on Wednesday next. Everyone should take advantage of this demonstration on that day. Refreshments will be served.

J. Johnson, late of Winnipeg, has been placed in charge of the Canadian Railway News Co. at the local depot. Mr. Johnson and his wife are experienced restaurant keepers and the public are assured of a first-class service.

EAST NO LONGER HAS ATTRACTIONS FOR HIM

Former Wainwrighter who Intended Remaining in Ontario is Coming Back.

W. Pigeon, who left here last spring for his home in the east, has decided that Ontario no longer has attractions for him. According to a letter received from him by Herb Smith, Mr. Pigeon is making arrangements to return here at the earliest possible moment. He owns valuable property on Fifth Ave. and on his return here will erect two houses.

AXEL JOHNSON IS REPORTED DEAD BY HIS OWN HAND

Former Clark Manor Farmer is Said to Have Cut His Throat.

A report is in circulation about town that Axel Johnson, formerly of Clark Manor, but later of Victoria B. C., committed suicide in a Chinese restaurant in Victoria last week. Mr. Johnson was a prosperous farmer residing north-west of here until about two years ago, when he decided to start on a trip that would take him around the world, before returning to his home in Sweden. Those who know Mr. Johnson are not inclined to give credence to the report.

WAINWRIGHT LOOKS GOOD TO THEM AND THEY INTEND BUYING

Ontario Farmers Choose Wainwright District in Preference to All Others.

Mr. John Jarrell, a resident of Kincarden Township, Bruce Co., Ont., was in town yesterday with his son, both of whom are looking for a location in western Canada. Mr. Jarrell has visited many points in the west and has looked over many different districts, and he stated before leaving here last night that it was his intention to locate in the Wainwright district for he believes it is the best he has seen.

"We have neighbours in Ontario," said Mr. Jarrell, "who are waiting for us to get back. They are anxious to locate in a new district in the west and I will have no hesitation in recommending Wainwright to them. I can say this conscientiously and if farmers in our locality can dispose of their farms I believe many families can be persuaded to come to this district."

While here they were shown over the district by A. E. Mills, of the Wainwright Realty Co. and were very enthusiastic on their return from the country over what they had seen. This is another instance of eastern farmers showing favour to the Wainwright district and it is expected that good results will follow before the close of the year.

From all indications a large number of local people will visit Gilt Edge tomorrow and participate in the amusement being afforded at the second annual sports day being held there.

H. B. Walker was a week-end visitor in town. Mr. Walker who did a large amount of cement sidewalk work here, is tendering on some municipal work of a similar character in Lloydminster.

ANOTHER TRAMP GETS 30 DAYS TO PONDER IT OVER

Brought Back from Unity and is Committed for Trial for Housebreaking.

On Thursday night last, two tramps were seen getting into the kitchen window of the Wainwright Hotel, but before they were able to effect an entrance were affrighted by roomers at the hotel. Night Watchman Crampton heard cries for police and followed the two men to the car tracks where they were lost sight of. He and Constable Wilson then searched the cars and next morning they were seen breaking into a car of the train going east.

The police at Unity were wired to and one of the men arrested that day. Constable Wilson brought him back and the man was given a hearing before Justice of the Peace Ross. He was sentenced to 30 days in jail and committed for trial on a charge of attempted house breaking.

EXPECTED THAT GOOD BALL WILL BE SEEN HERE DOMINION DAY

Fans Are Doing their Best to Arrange Good Games for that Day.

It is expected that some good baseball will be witnessed here on Dominion Day and the committee in charge of that part of the programme is making arrangements with a view to securing teams from both Scott and Irma. Wainwright is now fortunate in having some of the best amateurs the town has ever had and all that is needed is a battery. Manager Graham is in communication with several good pitchers who are desirous of coming here, and if positions can be secured for them at least two will be imported. The club is not in favor of having paid players on the team, so that experiences encountered in 1912 will be repeated.

Until yesterday it was thought that the team would be sent to Scott to compete for the prize money of \$300, offered in the baseball tournament there today. The club being able to secure a battery resulted in the team not being entered.

A picnic is being held at the Battle Heights school on Thursday next, June 24th. Any surplus from the day's sports will be turned into the fund already started to buy a piano for the school. A big dance will be held in the evening.

A good job has been done on the town streets in levelling down the high places, which for sometime have proved sufficient cause for many cuss words from those who run cars.

Geo. Boyd reports that oats he seeded five days ago have appeared above the ground, and barley seeded six days ago is also above the ground. In ordinary years it has taken from ten to twelve days for grain of this kind to germinate to such an extent.

V. E. Graham and S. Sorenson have gone into the hog business and have a large number fattening on Mr. Graham's farm south of town. They intend buying two carloads and shipping to the Edmonton market. They are paying the highest market price.

The company owns valuable leases of property adjoining the Battle River and intends commencing active drilling operations, immediately the above allotment is disposed of. Shares are going quickly and therefore the drilling outfit will be seen on the land in the near future

In view of the capitalization of the company, and the valuable leasehold interests held by it, the shares are cheaper than any other company on the market.

BORING THE MOUNTAINS

IMMENSE ENGINEERING FEAT IS UNDERTAKEN AT ROGERS' PASS

New Location for the Line Will Shorten C.P.R. Route by Four Miles—Work Involves the Expenditure of Over Ten Million Dollars.

In the vast amphitheatres formed by the ranges of perpetually snow-capped mountains, which surround the base of the Selkirk, modern science today is pitting its wit against the titanic forces of nature. A tremendous conflict is being waged in the valleys on either side of the summit where the primordial has held sway for countless ages.

Brains and brawn, backed by modern machinery, modern methods and scientific organization, are combining to circumvent the elements. Huge iron mammoths are scooping out with rock-a-cannon mountains, and powerful explosives are rending the innermost recesses of the hills to serve the needs of a transcontinental railway system and to permit of the onward march of progress.

The new location for the line will shorten the route by four miles. The enterprise is officially known as the Rogers Pass tunnelling scheme, and the work and related improvements will involve the expenditure of more than \$10,000,000.

Since the Canadian Pacific first opened its transcontinental line through the mountains of British Columbia it has spent millions of dollars in protecting and renewing its tracks on extra locomotives used to haul trains up the steep grades, and in coping with the snowfalls, and other physical handicaps which keep a large force of men and a large amount of expensive equipment busy nearly all the year. At Rogers Pass close to the summit of the Selkirk, the company maintains large engine sheds, shops, snow sheds and outfit ready to service the line on either side of the Selkirk range.

The engineer spent two years seeking a favorable location for a tunnel through the Selkirk. The C.P.R. decided on the Rogers Pass tunnel, and the undertaking and related double tracking work last spring, preliminary operations being started last autumn.

The contractors, who have in hand the tunnel scheme are applying an entirely new method in tunnel placing, they are projecting what is known as a "pioneer bore." This is a small preliminary tunnel, driven by pneumatic drills, which will be used to locate the main tunnel, and will be driven at the same time. The idea is quite in the nature of an experiment and was decided on after a long and careful calculation and mature consideration.

One of the principal reasons for the adoption of the new plan was the fact that the Canadian Pacific wished to have the underground tunnel completed by December 31, 1916, three years and a half from the time the work was started. Building a tunnel, which is a lengthy process in the ordinary way. Only a limited number of men can be employed at one time and delays constantly occur on account of blasting and other causes.

With the "pioneer" bore the work will be greatly facilitated. Side shafts will be excavated, leading laterals, and the work of the main tunnel and drill will be thus enabled to attack a number of points at once. The blasting is proceeding in one part of the shaft the workers will be able to continue their activities in another, instead of having to wait each time a shot in fired as would be the case in the one heading. The same applies to the excavating of the work. Lines of cars loaded with material can be kept continually in motion from the surface to the bottom of the shaft, and the material, which would not be possible were the operations concentrated all at one point.

Another great advantage of the fact that the "pioneer" bore will act as a ventilating shaft, enabling the passage of a current of air through two bores and the connecting passages. It will also serve a permanent purpose in the same connection with the completion of the main tunnel.

The tunnel operations have a decidedly human interest. The men, who are working in the dark, are seen calmly proceeding with their allotted tasks, paying little heed to the significance of their work.

The work is carried on in much the same way as in the levels of a mine. Stages are driven and bores are bored with air shovels, which have exploded and the shattered material placed on cars and run out along narrow gauge tracks. The men are kept a current of air in circulation removing the dust from the drills and clearing the atmosphere of the poisonous gases from blasting.

Spain Wants Jews to Return

The development of a centre of Jewish knowledge in Madrid is being undertaken by the Spanish government in the hope that it may bring about a return to Spain of some of the Sephardic or Spanish Jews living in the east of Europe.

They take an aristocratic pride in their purity of blood and long pedigree, ranking high in the social scale wherever they may have settled. They have never lost the love of the Spanish language, and the Jews have been scattered throughout Morocco.

300 MILES AN HOUR

Latest Trials of Miracle of Science Comes From France

The London Standard and Express devote considerable space to describing "the latest miracle of science," as shown in a very recent building in the city. Emilio Bachelard, an old Frenchman, long a resident in America, is said to have produced a railway system, permitting of a speed of 300 miles an hour, and made of steel, with aluminum base. This metal, suffering magnetic repulsion by electricity, is mounted on a car, which is suspended under the track, holds the cars suspended in the air. A series of tunnel shaped elements along the track, which are successively electrically magnetized, pull the suspended car, at terrific speed.

This type of car is intended for goods and mail traffic, Bachelard contending that the cost of carrying 300 would be a cent per pound. The cost of laying the track would be \$25,000 a mile plus \$200,000 for power houses at each hundred miles. The passenger car would be fitted with electric fans and motor fans, which are possible to do the present journey from London to Manchester in forty-eight minutes, instead of the four hours and a half hour journey now consumed in the journey from London to Manchester.

Experiments with large sized models of the proposed system, conducted by Bachelard, were offered the use of a circuit, within five miles of London to test the system. The model, which represents 20 years' experiments. The Express editorially remarks that it is a tall tale, and that the invention for material for an Arabian Nights or a Jules Verne novel.

Since the Canadian Pacific first opened its transcontinental line through the mountains of British Columbia it has spent millions of dollars in protecting and renewing its tracks on extra locomotives used to haul trains up the steep grades, and in coping with the snowfalls, and other physical handicaps which keep a large force of men and a large amount of expensive equipment busy nearly all the year. At Rogers Pass close to the summit of the Selkirk, the company maintains large engine sheds, shops, snow sheds and outfit ready to service the line on either side of the Selkirk range.

The engineer spent two years seeking a favorable location for a tunnel through the Selkirk. The C.P.R. decided on the Rogers Pass tunnel, and the undertaking and related double tracking work last spring, preliminary operations being started last autumn.

The contractors, who have in hand the tunnel scheme are applying an entirely new method in tunnel placing, they are projecting what is known as a "pioneer bore." This is a small preliminary tunnel, driven by pneumatic drills, which will be used to locate the main tunnel, and will be driven at the same time. The idea is quite in the nature of an experiment and was decided on after a long and careful calculation and mature consideration.

With the "pioneer" bore the work will be greatly facilitated. Side shafts will be excavated, leading laterals, and the work of the main tunnel and drill will be thus enabled to attack a number of points at once. The blasting is proceeding in one part of the shaft the workers will be able to continue their activities in another, instead of having to wait each time a shot in fired as would be the case in the one heading. The same applies to the excavating of the work. Lines of cars loaded with material can be kept continually in motion from the surface to the bottom of the shaft, and the material, which would not be possible were the operations concentrated all at one point.

Another great advantage of the fact that the "pioneer" bore will act as a ventilating shaft, enabling the passage of a current of air through two bores and the connecting passages. It will also serve a permanent purpose in the same connection with the completion of the main tunnel.

The tunnel operations have a decidedly human interest. The men, who are working in the dark, are seen calmly proceeding with their allotted tasks, paying little heed to the significance of their work.

The work is carried on in much the same way as in the levels of a mine. Stages are driven and bores are bored with air shovels, which have exploded and the shattered material placed on cars and run out along narrow gauge tracks. The men are kept a current of air in circulation removing the dust from the drills and clearing the atmosphere of the poisonous gases from blasting.

Spain Wants Jews to Return

The development of a centre of Jewish knowledge in Madrid is being undertaken by the Spanish government in the hope that it may bring about a return to Spain of some of the Sephardic or Spanish Jews living in the east of Europe.

They take an aristocratic pride in their purity of blood and long pedigree, ranking high in the social scale wherever they may have settled. They have never lost the love of the Spanish language, and the Jews have been scattered throughout Morocco.

Wax Baths New Cure for Nerves

Much interest has been aroused in medical circles by the new wax bath treatment, which has been developed by Dr. Barthelemy de Sandfort, and described in full detail in the London "Telegraph."

The doctor especially claims it is superior to all other forms of thermal treatment in that it has no effect, while other thermal methods tend to debilitate the patient.

Further, the wax bath is perfectly innocuous to the weakest, while cardiac patients cannot always bear the heat of ordinary baths. Dr. de Sandfort declares he has made extraordinary cures with rheumatism, neuralgia, and sciatica.

Dr. Frederick P. Walton, for several years dean of the law faculty at McGill University, has spent the last year in Europe, and is in course of lectures at the government law school, Cairo, has now been appointed minister to the Egyptian government.

PROBLEM OF ASSIMILATION

Toronto Correspondent of The Times Writes on the Americanization of Canada

The Toronto correspondent of the London Times contributes an article on "The Americanization of Canada," in which what he calls the "American Problem" is described. The correspondent asks: "Do the British people understand and reflect upon imperial problems in the same way as the Canadians? It seems to be the fashion, he says, in Great Britain to regard Canada as bound and fettered by historic tradition, by long association, by common interest and sympathy. Probably these elements are inspired by Canadian patriotism, but the enormous influx of immigrants has created new conditions and problems. It is certain that they can be moulded into a common devotion to the empire, but they are attracted by a vision of an independent Canadian republic."

His argument that there is a movement to Americanize Canada, draws attention to the fact that the whole of the British news to the back ground in favor of items from America, and that the news from Canada is now giving more attention to British news, for its new value, which they are desirous to receive from the United States.

"We are all passive imperialists," he writes, "and it is not only in Canada, but in the United States, that there are elements in Canada, to which an appeal against imperialism is made, who know no other way."

Tuberculosis in Dairy Cattle

In the United Kingdom an effort is being made by law to stamp out tuberculosis in cattle. Speaking at the annual meeting of the National Association, Sir Sydney Pockock, representative of the association on the committee, said that the new tuberculosis (animal) act, reported with regard to the statistics of the disease, had been in force since the end of September last to the effect that out of 5,162 cows found to be diseased, 1,000 were found to be tuberculous.

After the way the public had been educated by the act, the government is drinking milk which might be affected, and generally frightening them, and the government is not taking into consideration the fact that the disease is not spread by the milk, but by the contact with the diseased animal.

There is no superstitious more deeply ingrained in all classes of society than the belief that the disease is spread by the milk. As an emblem of good fortune it holds pride of place. Nelson did not come and the British fleet was not defeated at the battle of the Nile, and the British fleet was not defeated at the battle of the Nile, and the British fleet was not defeated at the battle of the Nile.

MILITARY VIEW

General Otter on Unpreparedness of Canada for War

Replying to a question by a "Canadian Militia," at the Royal Grenadier's annual dinner at Toronto, General Otter, who has been made some strong statements in regard to the unprepared state of Canada for war, said that the Canadian Militia, at the present time, are not prepared for war, and that the Canadian Militia, at the present time, are not prepared for war.

Japan Will be There

The Japanese government has announced that the state department at Washington has received a communication from the Japanese government, in which it is stated that the Japanese government has decided to participate in the international naval conference at London, which is to be held in 1920.

Do Light Rays Develop Germs?

Dr. Roix, director of the Pasteur Institute in Paris, held the other day, at the Académie de Sciences, a meeting of the Académie de Sciences, in which he presented a paper on the subject of light rays and germs.

Big Dividends in Diamonds

Colonial Mining Company of Germany has paid \$1,200,000 per cent. in dividends for the year 1915.

Wax Baths New Cure for Nerves

Much interest has been aroused in medical circles by the new wax bath treatment, which has been developed by Dr. Barthelemy de Sandfort, and described in full detail in the London "Telegraph."

The doctor especially claims it is superior to all other forms of thermal treatment in that it has no effect, while other thermal methods tend to debilitate the patient.

Further, the wax bath is perfectly innocuous to the weakest, while cardiac patients cannot always bear the heat of ordinary baths. Dr. de Sandfort declares he has made extraordinary cures with rheumatism, neuralgia, and sciatica.

Dr. Frederick P. Walton, for several years dean of the law faculty at McGill University, has spent the last year in Europe, and is in course of lectures at the government law school, Cairo, has now been appointed minister to the Egyptian government.

THE LIVES OF THE FAR NORTH

MISSIONARY DESCRIBES THE TRAITS OF THE EKIMOS IN THE ARCTIC CIRCLE

Does Not Think That There is a Future for the Extreme North Country, Except as a Fur-Bearing Region—Describes Blanche Ekimie.

When Stefansson, the Arctic explorer, declared that the Eskimo who has not been spoiled by civilization, he made a statement regarding the "people" which is not supported by facts, said Archdeacon Whitaker, who, with a party of nine, left Edmonton on May 1 for the Arctic mission fields of the far north. He will be stationed at Port McPheron, at the mouth of the Mackenzie river.

His own view of the Eskimo has been acquired by his own experience. He began his mission work among the natives of the Arctic Circle country, under the leadership of the Rev. Dr. J. H. McPheron, who was a missionary of the Anglican Church, and who was a missionary of the Anglican Church.

He has seen the Eskimo in his own country, and he has seen the Eskimo in his own country, and he has seen the Eskimo in his own country, and he has seen the Eskimo in his own country.

SPIRITUAL HEALING

Neglect of Medical Treatment in Cases of Mental Disease in Flight Report Presented

The report of the committee on spiritual healing or faith cure, appointed by the Department of Mental and Medical Affairs, has been laid on the table in the House of Commons.

The report, which was presented by Sir Bryce Duckworth, the Dean of Durham, the Dean of St. Paul's, Sir Douglas Powell, and Sir James Gordon-Lennox, states that the committee has found that the neglect of medical treatment in cases of mental disease is a serious problem.

The committee has found that the neglect of medical treatment in cases of mental disease is a serious problem, and that the neglect of medical treatment in cases of mental disease is a serious problem.

The committee has found that the neglect of medical treatment in cases of mental disease is a serious problem, and that the neglect of medical treatment in cases of mental disease is a serious problem.

MONOPLANE FOR ATLANTIC TRIP

Gustave Hamel Hopes New Machine Will be First to Make Long

A Zugo monoplane, it is learned, is being built for transatlantic flight by Gustave Hamel, a Frenchman, at Brookland, England.

It is noticed, too, that Gustave Hamel, one of Britain's greatest aviators, whose ambition is to have this achievement to his credit, is a frequent visitor to the Brookland Aerodrome, inspecting the progress of the machine.

A small machine of 40 foot span, built by the same firm is now flying 30 miles an hour with a 120 horse power engine and is lifting high loads. The new monoplane is of the same type, closely resembling the "Antoinette," flown by Hubert Latham in the James Gordon-Lennox race, at Belmont Park, N.Y.

It has a 65 foot span and is 14 feet from the front of the wing to the back. An engine of 250 horsepower is required to carry oil and gasoline for 24 hour flight, with a guaranteed speed of over 50 miles an hour during that period. The machine also must carry fuel, a passenger and navigating instruments and wireless outfit.

She is expected to be the biggest and fastest monoplane in existence. It is officially admitted that the machine is being built for a long distance and during the latter part of the year, 25 hours, 25 minutes, 55 seconds. It is expected that the machine will fly her for a transatlantic crossing.

Applies for the Prairie Provinces

The use of the prairie provinces for the purpose of a national park, as suggested by Dr. Wm. Saunders, is being considered by the government. The prairie provinces, which are now in the horticultural district, department of agriculture, Ottawa, are now in the horticultural district, department of agriculture, Ottawa.

HAS A WESTERN CANADIAN

AN AMERICAN WRITER TELLS OF THE WONDERFUL PROGRESS BEING MADE

Frederick Foster, writing in an American Magazine, describes the rapid development of the Canadian West—Pioneering the Luxe.

Frederick Foster, member of Ohio Historical and Archaeological Society and National Geographic Society, says, in a recent issue of an American magazine:

"When I first began going into the Canadian West on tours of investigation, I often welcomed the almost diversion which might break the monotony of the prairie, the stillness of the forest, a moose crashing through the trees, the honking of a waterfowl, even the scurrying of a sopher through the grass. But it is different now. Old Joe Boyd, up at Glenside, Portage in British Columbia, has introduced the present conditions in this fashion. I have just got to hunt new ground."

He is expected to be the biggest and fastest monoplane in existence. It is officially admitted that the machine is being built for a long distance and during the latter part of the year, 25 hours, 25 minutes, 55 seconds. It is expected that the machine will fly her for a transatlantic crossing.

He is expected to be the biggest and fastest monoplane in existence. It is officially admitted that the machine is being built for a long distance and during the latter part of the year, 25 hours, 25 minutes, 55 seconds. It is expected that the machine will fly her for a transatlantic crossing.

The Grattan Oil Co., Ltd.

Capital \$500,000.

Shares \$1 Each, Par Value

The Grattan Oil Company, Limited, is a sound, reliable organization, directed wholly by Edmonton men of well known standing, which offers the public an opportunity in a thoroughly prospected proposition. It will pay you to enter into details and satisfy your self of the genuiness of this undertaking.

VALUABLE LEASES SECURED

The Project has been examined by our own geologist, and selected after a thorough survey of other oil fields in Alberta. This field has been donated as a favourable one by the following eminent men of the Canadian Geological Survey, Dr. Dawson, Dr. Dowling and Mr. Tyrrel, See reports 1882-83-84 and 1886.

LOCATION OF LEASES

Sections Thirty-two (32) and Thirty-three (33), Township Forty-four (44), Range Eight (8), West of the Fourth Meridian in the Province of Alberta;
Section Thirteen (13), Township Forty-five (45), Range Eight (8), West of the Fourth Meridian in the Province of Alberta.
The oil-bearing strata—Dakota and Devonian—are closely associated in this field. It is expected the Dakota will be reached under 1800 feet.

**100,000 SHARES ARE NOW OFFERED

SYNOPSIS OF COAL MINING REGULATIONS

Coal mining rights of the Dominion, in Manitoba, Saskatchewan and Alberta and the Yukon territory, the Northwest Territories and in a portion of the province of British Columbia, may be leased for a term of twenty-one years at an annual rental of \$1 an acre. Not more than 3,560 acres will be leased to one applicant. Application for a lease must be made by the applicant in person to the Agent or Sub-Agent of the district in which the rights are applied for are situated.

In surveyed territory the land must be located by sections, or legal subdivisions of sections, and in unsurveyed territory the tract applied for shall be staked by the applicant himself.

Each application must be accompanied by a fee of \$5 which will be refunded if the rights applied for are not available, but not otherwise. A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

The person operating the mine shall furnish the Agent with sworn returns accounting for the full quantity of merchantable coal mined and pay the royalty thereon. If the coal mining rights are not operated, such returns shall be furnished at least once a year.

The lease will include the coal mining rights only, but the lessee may be permitted to purchase whatever available surface rights may be considered necessary for the working of the mine at the rate of \$10 an acre.

For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion Lands.
W. W. COBURN,
Deputy Minister of Interior
N. B. — Unauthorised publication of this advertisement will not be held for.
